- ① Regular Bi-Parting Door.
- ② For Extended Sill or Pass Type, add 1.75" [44,5] to 'HD' or 'HJR' for each door.
- ③ Designed for 8'-0" [2440] high cab & entrances.
For 9'-0" [2745] high Cab & entrances, Overhead + 0'-6" [152], Pit + 0'-6" [152], min travel will be increase by 1'-0"
For 10'-0" [3050] high Cab & entrances, Overhead + 1'-0" [305], Pit + 1'-0" [305], min travel will be increase by 2'-0"
- ④ Columns are to be extended from pit bottom to overhead beam supports. Where adequate brick or concrete walls are used, columns supports are not required. It is an understatement that sizes of structural columns and framing members are approximate. Accurate data will have to be provided by owner when exact loads, car sizes, floor heights etc., are available. All structural columns, ties connections are to be provided and erected by owner.
- ⑤ For every inch added on the travel (floor to floor), you must add the same either to the pit or to the overhead.
- ⑥ For higher speed, contact us.
- ⑦ For C2 Loading Class, contact us
